

The Wizard's Dilemma: Truth or Trick?

Is it true or is it a trick? Use your wizard skills to find out!

You've been training for weeks in the Wizard's Tower, learning spells, potions, and about magical creatures. One evening, while exploring a hidden room, you discover an old, dusty book with glowing letters. As you open it, the pages turn by themselves and stop at a page with a strange riddle:

"To prove your wizarding powers, you must solve the riddle of truth and trick. Only the wisest can tell the difference between what is real and what is magic."

The book glows with magic, and you know this is your chance to unlock the next spell. You focus and read the question carefully. It might be a tricky one, but your wizard skills are ready!

Before you, a magical image appears. You see a creature with the body of a lion, the wings of an eagle, and the head of a mighty bird. This is a griffin, a legendary creature from ancient myths. Griffins are said to be fierce and noble, guarding treasures and secrets.
